Description of problem: _____

What services do you require?

- Centrifugal Supercharger rebuild: \$170 USD general labor plus parts.
- Roots, or twin screw supercharger rebuild: \$425 USD general labor plus parts for drive snout and supercharger. Exception: IHI Turbo and Techco are \$680 and \$1,320 depending on model.
- When shipped separately: Drive snout ONLY \$42.50 USD labor plus parts.

Add on services:

- **Expedited Service (1 to 2 business days)**, \$400 USD add-on fee for roots or twin screw. \$200 USD add-on fee for centrifugal. \$20 USD add-on fee for bypass, jackshaft, or drive snout. (when sent separately). Please mark box with the words **URGENT** near the shipping label.
- **Extended warranty to 36 months/unlimited mileage. \$400 USD**. Covers JBP labor, bearings, seals and any hard parts purchased from JBP. Does not cover abuse from neglect or intentional misuse.
- Jackshaft or Bypass Rebuild: \$42.50 USD labor plus parts.
- Large or multi-piece manifold charge: \$42.50 USD plus parts.
- Interior/Exterior Intercooler Flush: \$42.50 USD labor.
- Oil Level Sight Glass: \$25.50 USD plus part. Requires customer to tape or pencil horizontal level line on supercharger as mounted on engine.
- Supercharger porting estimate. We port a variety of superchargers and manifolds. Prices vary based on time.
- Ceramic rotor coating based on rotor length: 1-7" \$100 USD 7-9" \$150 USD 9-12" \$200 USD
12-18" \$250 USD 18-24" \$300 USD
- Powder coating, ceramic coating, and surface preparation estimate. Color will be verified later. \$85 per hour. Materials billed separately.
- Custom Fabrication, Aluminum Welding, General Labor: \$85 USD per hour.

I agree to all terms and conditions as set forth in this Repair Request Form and links provided. I authorize JBP to disassemble and inspect the item sent in. By signing this document, I also authorize that general approval will be granted at a later time by phone or email by me or someone I know, unless otherwise stated here. I also authorize this signature to substitute as an agreement for payment when a credit card, bank, or Paypal payment is submitted.

Signed: _____ Date: _____

PLEASE NOTE THAT NO WORK WILL BEGIN WITHOUT A SIGNATURE. THIS FORM MUST BE INCLUDED WITH YOUR SUPERCHARGER AND SIGNED. The 2nd page is not required and is available for your information.

Let Jon Bond Performance re-manufacture your roots or twisted roots style supercharger head unit and drive snout like new and include a 6 month unlimited mileage warranty! If you suspect that your supercharger is making noise- STOP using it and check your belt idler pulley or other items for noise. If it continues, waste no time sending it in for a rebuild.

Please use the above form to send in your supercharger. We do NOT offer pre-approval. Superchargers are assigned an estimate number after they arrive.

Inspection: All superchargers are 100% disassembled, inspected, and an estimate provided at no charge. Diagnosis of the failure will be provided. Repairs are not conducted without full approval. If a unit cannot be repaired, there is no charge. If a replacement is available, we will provide an estimate plus trade in of any good parts out of the damaged unit.

Rebuilding: Full rebuilds of MOST Twin Screw or Roots Superchargers are \$425 USD general rebuild labor plus parts. Full rebuilds of Centrifugal Superchargers are \$170 USD general rebuild labor plus parts. Techco, IHI may have higher initial labor costs. All consumable parts are replaced with OEM or higher quality name brand parts. If the proper parts are not available, JBP is the only company that pays to have the correct parts produced and in stock. We do not glue, epoxy, or silicone incorrect parts in place. We do not offer lower quality tiers of parts to bring the cost down, nor do we reuse consumables. We use only the best parts on all rebuilds. All other parts are based on condition. All old parts are returned. There are extra labor fees for damaged or seized hardware, to repair damaged components, rebuild jackshafts, multipiece manifolds, and a full bypass rebuild. Damaged component charges typically result when someone has damaged components by improper disassembly or kept the supercharger in service to the point of failure. The average cost of a rebuild can vary by brand. Most superchargers are around \$772-\$850 for parts and labor. Those with a full manifold, jackshafts, and intercoolers can expect the repair to be around \$900 to \$1100 depending on model. An inspection will be the only way to determine if your supercharger can be repaired. We will not assemble or repair any unit that cannot be properly re-manufactured. Final testing is provided on an electric dyno for noise testing.

For self contained superchargers, JB Performance also provides an exclusive oil developed and tested by Tribodyn and JB Performance. The ceramic technology developed delivers 40F to 90F degrees lower gear case temperatures.

Warranty: 6 month limited warranty when properly maintained. Limited warranty covers bearings, seals, and JBP labor to replace the failed part. It does not cover damage from improper maintenance, exceeding manufacturer's maximum RPM, damaged to rotor timing from engine detonation, continued use when making noise, shipping, or the labor to remove/install it on the vehicle. Requires supercharger head/drive snout to be returned for analysis. Directions on proper care and how to prevent failures is supplied with a rebuild. 30 month limited warranty extensions are available. Please see [Conditions](#) for more information.

Communication: If you would like to know when the item arrives at JBP, please use tracking. JB Performance will contact you as soon as the inspection and estimate are completed as well as when the rebuild is completed.

Time: First come, first served- no RMA or Pre-approvals. Click here for current [Lead Times](#). They change often. Exceptions are granted for 'Expedited Service'. This is available for a higher fee with shorter wait time. See page 1.

Return shipping: Return shipping is about \$1 to \$1.50 per pound and is based on size, weight, and address, and carry \$100 minimum insurance with signature confirmation and tracking. Extra insurance is available. See page 1.

Precautions: Drain any oil, fuel, and intercooler coolant. Remove any sensors, fuel injectors, throttle body, if possible. Protect any plastic parts, pulleys, intercoolers, from damage. Use at least 2" of rigid packing material such as layered cardboard, solid foam board, Instapak, ect. Extra fee of \$10 is charged if packing peanuts are used. They do nothing to protect your investment. We recommend a dual wall box for heavy items (50lbs or better). Supplies can be purchased at [ULINE](#).

International Customers: Please mark your package as Temporary Import for Repair. Send us this form by email and we can help with import paperwork. Return shipping is conducted by UPS or USPS. We have over 40% off fees for return shipping. No charge to process return customs paperwork. Taxes and duties are not pre-paid, nor are they estimated here.

Payment: We accept check, wire transfer, electronic bank payment, Paypal, Visa, Discover, Mastercard, and American Express.
